March 2019

The beginning of the spring is the time when we make and offer the small symbol called "martisor". We offer it to the friends together with good wishes for great love, good-luck, happy spring. This year, the residents at Milly's Village made lovely little "martisoare" made out of fimo (special colourful modeling paste that you burn in the oven), wood, wire and of course the white and red thred. The recipients of the little gift wear it like a broach or like a bracelet.

8th of March is a special day dedicated to the beautiful women around! It is about gratefulness to the mothers, daughters sisters for what they do and what they are.

On the 9th of March we celebrate a special religious day called "the 40 saints", we make special cakes (called mucenici), they are like sweet bread braided to look like 8 number, covered with honey and walnuts. Our kitchen prepared very delicious "mucenici" served with pleasure by the residents and the visitors. 5 of the beneficiaries celebrated their birthdays with singing, dancing and more cakes.

The literary clubs covered the great work of Ion Creanga and Nichita Stanescu, both well known writers and poets.

The occupational therapy sessions covered mainly indoors activities, group sessions and playing with baby goat "Vasile"!!!

„ I've always liked to be of help for people” Andreea – nurse

I chose to be a nurse because of my abilities to act quickly when needed for various medical emergencies. I love to treat, give advice and see people feeling better and thanking me for that.

I strongly believe that communication and empathy are necessary for understanding the needs of the beneficiaries and for making them feel trusted, safe and respected. As a nurse, I need to study all the time and put in practice what is best for our beneficiaries.

My real satisfaction is when people around me smile and feel better because of my activity.

“if you love people it’s easy to do your job with professionalism” says Andreea and we thank her for her great

work!

Andreea has been working as a nurse since 2017, she works closely with her colleagues and follows the advise of the doctor.

that my mother lives there.” Mrs.loana, daughter.

Testimonial

“My mother, Valeria, was admitted in March 2018 after a long and traumatic series of hospital care, illness and pain. I found this place and I am so lucky to find here safety, respect and great care. It is exactly what I wanted for the most precious person in world for me, my mother. The staff at Milly are well trained, careful, respectful and are wonderful people!

I am very grateful and I feel so much better knowing
